

## **EDS Technologies tie's up with US based MAK Technologies, a leading supplier of distributed simulation software**

**May 2006**

MÄK Technologies, the world's leading supplier of distributed simulation software, announced that EDS Technologies has become their sole, official distributor in India. "MÄK is pleased to be working solely with EDS Technologies in India," said Marc Schlackman, MÄK's vice president of sales and marketing. "They have proven themselves a strong player in the Indian simulation software market.

MÄK is very committed to the Indian market and, together with EDS Technologies, will be conducting seminars and training for organizations in the simulation industry. EDS Technologies, with its vast experience in simulation has the technical capability to provide local support, training and software implementation."

"It's an honor to be MÄK's sole distributor in India," said Prashant Pawar of EDS Technologies. "MÄK's outstanding total solution for distribution simulation applications combined with our capabilities in marketing, distributing and implementing simulation solutions make us a powerful team. We are confident that customers in all areas of the simulation industry will benefit from this partnership and that it will enhance both companies."

### **About MÄK Technologies:**

MÄK Technologies develops software to link, simulate and visualize the virtual world. We create tools and toolkits for distributed simulations, develop PC-based military tactical trainers, craft custom solutions, and research and develop the latest simulation technologies. We build commercial off the shelf simulation software that is flexible, portable and supported.

Whether you choose our best-selling networking toolkit, VR-Link or our computer generated forces toolkit, VR-Forces, you have purchased a product backed by the industry's leading distributed simulation experts. Our worldwide customers include ITT Industries, Boeing, Lockheed Martin, Raytheon, Tenix, Dassault and BAE.

## **About EDS Technologies:**

EDS Technologies Pvt Ltd, a Ranal Group Company and a premier business partner of IBM in India and one of the fastest growing PLM solutions and service provider started its operations in 1995, with its head quarters in Bangalore, and having a presence in Delhi, Pune, Chennai and Hyderabad.

EDS Technologies plays a vital role in implementing CATIA V4, CATIA V5, Enovia, SMARTEAM and CAA in India across various industry segments. We are supporting more than 2000 CATIA licenses across India for more than 300 customer sites over the past 10 Years. EDST has met with considerable success in executing the PLM needs of Automotive, Aerospace, Manufacturing clients and their suppliers in India
