

EDS Technologies is the largest PLM solution provider in India with close to a decade of experience in implementing and supporting Dassault Systemes PLM solutions across a range of industries and manufacturing disciplines.

PLM Solutions portfolio

CATIA - Digital product definition and simulation

ENOVIA VPLM - Collaborative virtual product life cycle management

ENOVIA MatrixOne - Collaborative product development business processes

ENOVIA SmarTeam - Collaborative product data management

SIMULIA - Unified Finite Element Analysis

ICEM Surf / Shape Design - Advanced surface based modeling, design visualization

Virtools - Interactive 3D life-like experiences

"Product Lifecycle Management is a continuous process that enables an enterprise to effectively and efficiently innovate and manage its products and related services throughout the entire business lifecycle, from initial concept through recycling or disposal"

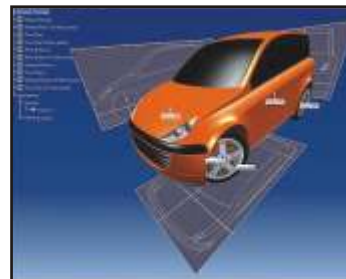

With PLM you can

- Optimize your development processes and develop exciting new products to meet the needs of a demanding market.
- Enhance productivity and collaboration throughout the product cycle.
- Protect and reuse valuable assets and company knowledge.
- Streamline your core processes through greater efficiency and leveraging your best resources.

EDS Technologies carries the most complete PLM solution for companies of any size and application. As India's largest PLM solution provider, EDS Technologies is a unique partner to help your company achieve its goals by solving its key business issues.

CATIA V5

CATIA V5 is the leading product development solution for all manufacturing organizations, from OEMs through their supply chains to small independent producers. The range of its capabilities allows CATIA V5 to be applied in a wide variety of industries, such as aerospace, automotive, industrial machinery, electrical, electronics, shipbuilding, plant design and consumer goods, including design for such diverse products as jewellery and clothing.

CATIA PLM Express

CATIA PLM Express is designed specifically for small and medium sized businesses. You can rapidly and easily define a solution that matches your business needs.

CATIA PLM Express offers

- A collaborative solution
- Ultra fast knowledge based modeling
- A fast path to rapidly ramp up to a complete PLM solution
- A quick start package for a smooth deployment in less than 10 days

CATIA PLM Express Upgrade

As a valued CATIA customer, you have the unique opportunity to transform and grow your business profitably through a fast PLM implementation by easily moving to CATIA PLM Express.

Tailored to meet your day-to-day needs, there is a recommended path available to upgrade your current CATIA implementation. Moving forward, CATIA PLM express makes it simple to expand to a complete PLM solution as the needs evolve.

CATIA PLM Express the fastest road to PLM

ENOVIA VPLM

ENOVIA VPLM provides a complete set of integrated solutions for virtual product modeling, lifecycle management, and decision support for companies making complex, high-value products.

Integrated and built on a common architecture with CATIA, ENOVIA VPLM provides a virtual product development environment where designers, sourcing specialists, and production planners work collaboratively to explore and validate design and manufacturing decisions, ensuring Design for Manufacturability and Maintainability.

ENOVIA SmarTeam

ENOVIA SmarTeam provides highly flexible product data management and mission-critical business process management, optimally leveraging product knowledge and driving collaboration across the enterprise and value chain. It enables small to medium-sized businesses (SMBs) and engineering departments of larger organizations to optimally integrate, manage and reuse their product knowledge and processes across applications, increasing their competitive edge.

SmarTeam Design Express

An out of the box solution for collaborative CATIA design with a built-in upgrade path to full PLM functionality.

SMARTEAM Design Express offers

- An approach to optimize multi-CAD collaborative design
- Pre-configured product data management solution for quick, easy ramp up
- Proven user methodology and training for easy user acceptance
- Best-in-class, native CATIA integration
- Industry-leading immersive CAD Integrations for SolidWorks™, Inventor™, Solid Edge™ and Pro/ENGINEER™

ENOVIA MatrixOne

MatrixOne delivers the industry's most flexible PLM environment that has been built with the needs and challenges of the global enterprise in mind. It is the Best-in-class Collaborative Product Development business process for enterprises across a wide range of industries.

Incorporating the best practices of some of the world's most innovative companies, MatrixOne combines unrivaled out-of-the-box PLM solutions with the ability to easily adjust business processes to meet the needs of customers, today and tomorrow, at the lowest total cost of ownership. It includes a full suite of proven PLM business process applications that cover a wide range of processes, including product planning, product development, product sourcing and program management.

Robust Enterprise Integration Capabilities - MatrixOne represents the industries most open and adaptable PLM backbone with dozens of off-the-shelf integrations and technologies to enable seamless data sharing between third-party enterprise applications and desktop authoring tools, including leading spreadsheet, word processing, project management, MCAD, EDA and software development applications.
