

designed for “plug & play” use within your company, without any customisation other than the addition of user names and the installation of working directories.

#### Keeping Pace with Your Growth

SDE's “quick start” is designed to give you full benefits with minimal disruption of your day-to-day operations. But once you've experienced the power of SDE, you'll want more.

SDE is the only PDM solution that includes a built-in upgrade path - a scalable system that will smoothly support your growing enterprise. Once your company has optimized its product IP within the SmarTeam database, you can easily add PLM functionality whenever you are ready. You choose how and when to move forward, by stepping up to a range of options for Product Lifecycle Management including:

- Enhancing design methodology according to company-specific needs
- Automating product data and business processes such as BOM and engineering change management across your organization
- Bridging from engineering to manufacturing and other key enterprise applications
- Linking your design management to your OEM's or suppliers

...and that's just the beginning. With SDE, an optimized future is in your hands!

#### ENOVIA SmarTeam and CATIA:

##### A solid foundation for building your PLM future

“We work as a team using a number of linked CATIA V5 models and associated design tools to ensure designs adhere to defined rules ... the latest project data is easily available to all engineers employed on the project, thereby ensuring that engineers are not working in isolation; they have full visibility of all design changes as they happen.”

- **D. Caines, Director of CAE, Integral Powertrain, UK, engineering services**

“All companies face the same issue: Meet the customer requirements and reduce the time-to-market. CATIA and SmarTeam are by far the best answer.”

- **M. Crozzoli, IT Director, Maschio Group, agricultural machinery**

“What favorably directed us...was primarily the excellent integration between the CATIA CAD, the Office IT system and the SmarTeam PDM. We also need to point out its user-friendliness, its simple management of the data security, its opening to other business systems (ERP, CAD/CAM...) In addition, its easy implementation and deployment were also determining factors.”

- **D. Pommerol, IT Manager, Sintered Products Division of Federal Mogul, automotive supplier**
